DATE OF BIRTH: 17TH AUGUST 2005

SEX: MALE

AREAS OF EXPERTISE

Data management and Analysis
Python Programming
Frontend Development
Backend development
Django framework

EDUCATION

B.Sc. Statistics (In view)

Current CGPA: 4.60

Olusegun Agagu University of Science and
Technology, Okitipupa, Ondo state.

SSCE, August 2020

De-Bright College

CERTIFICATIONS

**Diploma in Web Development and
Design (DWD), HIIT Plc (Jun 2021).**

**Diploma in Python Programming, HIIT
Plc (Jan 2022).**

OMOTOLANI BAJEGBO,

BSc (IN VIEW), DWD.

PROFILE

Highly analytical and detail oriented Full-Stack Developer with experience designing and building responsive web applications, developing scalable backend systems, and managing databases. Skilled in modern programming frameworks, data analysis, and applying statistical methods to interpret data and support data-driven solutions. Adept at debugging complex issues, extracting insights from data, and collaborating effectively with cross-functional teams to deliver efficient, user-focused software. Articulate communicator with bilingual fluency in English and Yoruba.

PROFESSIONAL EXPERIENCE

Freelancing; Upwork.

Python Programmer | June 2023–Present

- Developed and maintained web-based applications using **Python and Django**.
- Collaborated with team members to debug, troubleshoot, and optimize the codebase.
- Implemented and tested new features and functionality to enhance user experience and application performance.
- Integrated and interacted with third-party APIs for data extraction and implementation.
- Implemented a secure payment gateway for an e-commerce web application.
- Prioritized SEO best practices and ethical coding standards to improve application visibility and maintain clean, maintainable code.

Adeptbloc Ltd

Fullstack Developer intern Oct 2023– May 2024

- Developed and maintained responsive web applications using modern technologies such as **Python, Django, JavaScript, HTML, CSS, and React**.
- Designed and integrated **RESTful APIs** to enable seamless communication between frontend interfaces and backend services.
- Collaborated with cross-functional teams using version control systems (**Git/GitHub**) to manage code, track issues, and implement new features.
- Built and optimized database structures and queries to improve data storage efficiency and application performance.
- Tested, debugged, and troubleshoot applications to ensure reliability, scalability, and optimal user experience.
- Implemented secure authentication, payment integrations, and API services while following clean code practices and basic SEO optimization standards.

Crypto Price Tracker Application

Technologies: Python, Django, REST APIs, JavaScript, HTML, CSS, SQLite.

- Developed a web-based cryptocurrency tracking application that monitors real time prices, market volume, and other key market metrics for multiple cryptocurrencies.
- Integrated external cryptocurrency APIs to retrieve and display live market data with accurate and timely updates.
- Implemented an **automated email notification system** that alerts users about price changes over a specified period.
- Designed an intuitive interface for users to easily track and analyze cryptocurrency market trends.
- Optimized data retrieval and application performance to ensure efficient real-time updates and reliable user notifications.
